REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Claims 1-7, 12-13, 16, 32-39, 41-45 are considered allowable since when reading the claims in light of the specification none of the references of record alone or in combination disclose or suggest the combinations of limitations specified in the independent claims. As to claims 1-7, 12, 13, 16, the prior art of record does not teach suspending the transmission of the frame of data without waiting for the end of the frame when the first receives a stop transmission request embedded in a secondary communication channel between the second system and the first system. As to claims 32-34, the prior art of record does not teach a controller operably coupled to a full-duplex communication link; wherein the controller includes an encoder that encodes a secondary channel, and a decoder that decodes a received communication channel, wherein the secondary communications channel includes word level coding, and the system stops transmission of data without waiting for the end of a packet in response to word level commands received on the secondary communication channel.

As to claims 35, 36, 37, 41, 42, 43, the prior art of record does not teach suspending the transmission of the frame of data without waiting for the end of the frame when the first system receives a stop transmission request embedded in a secondary communication channel between the second system and the first system; and resuming transmission of the frame with the next word following the receipt of a

start transmission code embedded in the secondary communication channel, wherein the secondary communication channel is formed from groups of enhanced coded data words occurring at regular intervals in a data frame.

As to claims 44, 45 the prior art of record does not embedding flow control data in a secondary communication channel of the communications link for use by a primary communication channel of the communications link; and resuming transmission of the frame with the next word following the receipt of a start transmission code embedded in the secondary communication channel. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
